eWalk **PACE**

eWalk PACE is a powerful, easy-to-use system to collect and analyze data. This electronic administrative tool transforms data collected from teacher walk-throughs into meaningful reports and graphs to support long-term school and classroom improvement.

Key features

- Provides instant feedback
- Assess individuals or groups, including classes or user-defined teams
- Automatically records routine data such as date, time, and observer
- Authoring system allows custom inventory list creation
- Access to the eWalk PACE professional learning community
- Cheapest electronic teacher system available

Mobile observation with real time reporting

eWalk PACE is simple to learn and operate. It allows administrators to quickly record observations using various input elements such as pull-downs, checkboxes, numbers, text rubrics, timers, and counters. As part of an observation, users can attach photos, .pdf files, and more. Administrators have the ability to email the observation. Mobile observation results are uploaded to the web for aggregation and instant analysis. With the easy data entry, collection, and reporting, observers save time.

Supports school improvement

eWalk PACE provides evidence-based data to support teacher observations that document student outcomes and learning. The eWalk PACE professional learning community provides access to proven evaluations that can be replicated for your school. This data-driven system can also be used to improve your professional development with needs identification. By having the data accessible and usable, users can provide peer mentoring and instructional coaching anywhere, at anytime.

Unlimited possibilities

- Conduct management walk-throughs
- Create custom inventory lists
- Provide instructional coaching
- Process health and safety checklists
- Track incidents or building inspections

Smart Solutions for a Healthy Future

eWalk **PACE**   product specifications

Product specifications

- Web-based and compatible with: iPad, iPhone, iPod Touch, Android, Kindle Fire, Playbook, Blackberry, Windows Mobile, Palm, Blackberry, Mac, Windows, Netbooks, and Linux
- Data can be exported in standard formats for use in Excel, FileMaker Pro, or any other external program
- eWalk data is secured by password

How it works

Users can collect data through web-based forms or use a handheld device to perform walkthroughs, assessments, building audits, and more. The eWalk PACE authoring system allows users to create data collection templates for observations. It includes more than 15 question types, such as rubrics, checklists, drop-downs, and a selection of pre-built counters and timers. Built-in graphs, charts, and dashboards can be updated and aggregated instantly. Data collection templates can be shared across the eWalk PACE professional learning community, an entire district, or with individual schools and users.
